To Whom It May Concern:

I am writing to apply for the Linux HPC Expert position at HPC place. I learned of the opportunity via somewhere.

I am seeking a challenging new position and am open to relocation. I have more than a decade of practical and proven technical experience with multiple significant Linux HPC systems. In addition, I will be finishing up a Master's degree in Computer Engineering in September. My résumé outlines my experience and education in more detail. I hope you will take the time to review it.

After you have reviewed my credentials, I would appreciate the opportunity for a personal interview. I have complete flexibility as to the time and place of such an interview. Making initial contact and setting up logistics will work best via email, but you may also feel free to call my office phone any time during the work week from approximately 8:00 AM until 5:00 PM mountain time. You may also call my home phone during the work week after about 6:30 PM or any time on the weekend. Thank you very much for considering me for the position.

Sincerely yours,

Matthew P. Bohnsack
